Solar system generates 10% financial return in 10 months plus free electricity

Case Study

Mr & Mrs Mayfield's solar system was installed at their Northumberland home in February 2011.

In 10 months the system has already given the Mayfield's a financial return on investment of 10% PLUS 3100 kwh of free electricity, worth approximately £372 (based on 12p per unit and usage of all free electricity).

The Mayfield's will easily exceed their 10% annual return on investment in year one and the effect of inflation and rising energy costs means their return will grow annually for 25 years – and it is tax free!

“Very pleased, 10% return already in cash terms since February - not taking into account money saved from free electricity”...Mr & Mrs Mayfield, November 2011
